-

The final years of my schooling were an in-depth apprenticeship in Fine Furniture making at Carl Malmsten's CapellaGården in Sweden. Prior to my University level Furniture design instruction, I have had several years of Managerial experience. As of now, I have run my own studio for 15+ years based solely on commissioned work. I work primarily with one off custom furniture, instrumentation, product design, prototyping, and construction. I am a very active artist; as well as private instructor of fine woodworking and design, incorporating materials across the board. Although not currently active, I have been trained in life saving techniques, as well as CPR and First Aid. I speak fluent Swedish, and can understand German and Brazilian Portuguese. I also have obtained a Commercial, Class B drivers license and am a former member and active volunteer of Kiwanis International. I also run a CNC router in my personal workshop. I'm currently designing prototypes, and limited production manufacturing for large and small scale businesses. I use Autodesk Alias, Auto CAD, Inventor, Mecsoft Visual Mill CAM, Adobe Creative Suite, and Google Sketchup. My latest achievement is the procurement of the Title of Master in the Swedish Handworker's Guild. I am the 13th in my prestigious lineage of Masters, and the only 1 in the USA. I also hold a California general Contractor's License.
